Sub: Application for using electrical tools for ISRO Rover project.

Respected Sir,
We are team OBSERACT, working on a rover competition organized by ISRO, on behalf of Jadavpur University. And we gladly inform you that we have listed for the second round.
In this second round, **we need to use some electrical tools from your Lab** (Listed in below) for testing and analyzing the rover's performance.
For more inquiries, **kindly attention to Dr. Susanta Ray** (Faculty of Electrical Engg Dept)

Required Tools:

1) Multimeter
2) Installations tools.
3) DC power supply (at least 24V-30A)
4) 4 in 1 digital monitor (Current, Voltage, Power & Energy)
5) Thermal gun or tools for analyzing the thermal conditions.
6) Digital Osciloscope for analyzing electrical signals and noise.

We expect your helpful cooperation for the overall success of this team to shine our University. And thank you for your consideration.

Sincerely,
Team OBSERACT
Jadavpur University
